

Beauty Mineral Rejuvenation Complex Moisturizing Cream for Dry Skin

REJUVENATION COMPLEX formula is an innovative cosmetic development with its core components comprised of the REGU®-AGE complex, Dunaliella salina algae, natural minerals from the Dead Sea and extra natural vitamins. The revolutionary blend of these ingredients improves the supply of oxygen to skin cells while promoting the absorption of moisture and providing aging skin with the suppleness it demands. Enriched with vitamin E and sunscreen, this product helps to prevent UV damage as well as treat skin already suffering from the effects of the sun's radiation with Aloe Vera and tea oil to leave your skin soft, supple and smooth to the touch.

Beauty Mineral Rejuvenation Complex Anti-Wrinkle Cream

REJUVENATION COMPLEX formula is an innovative cosmetic development with its core components comprised of the REGU®-AGE complex, Dunaliella salina algae, natural minerals from the Dead Sea and extra natural vitamins A and E, adenosine triphosphate (ATP) as well as whey protein. Considered effective and active in the improvement and regeneration of the skin cells, the Rejuvenation Complex restricts oxidation and therefore assists in preventing the formation of wrinkles. This product also aids in reducing the damaging effects of UV radiation on the connective tissue while helping retain its natural firmness.

Beauty Mineral Rejuvenation Complex Nourishing Cream

REJUVENATION COMPLEX formula is an innovative cosmetic development with its core components comprised of the REGU®-AGE complex, Dunaliella salina algae, natural minerals from the Dead Sea and extra natural vitamins. This product improves the supply of oxygen to skin cells while promoting the absorption of moisture and providing aging skin with the suppleness it demands to assist in preventing the formation of wrinkles. By providing skin cells with revitalizing nutrients during the night while you sleep, the Nourishing Cream keeps your skin soft, supple and smooth to the touch.

Beauty Mineral Rejuvenation Complex Serum

REJUVENATION COMPLEX formula is an innovative cosmetic development with its core components comprised of the REGU®-AGE complex, Dunaliella salina algae, natural minerals from the Dead Sea and extra natural vitamins. The Serum, considered effective and active in the rejuvenation of the skin, is especially rich in ingredients that improve the supply of oxygen to skin cells, promote the absorption of moisture and provide aging skin with the suppleness it demands. This easily absorbed product also aids in reducing the damaging effects of UV radiation on the connective tissue while restricting oxidation and therefore assisting in the prevention of wrinkle formation.

Beauty Mineral Rejuvenation Complex Moisturizing Cream for Normal to Oily Skin

REJUVENATION COMPLEX formula is an innovative cosmetic development with its core components comprised of the REGU®-AGE complex, Dunaliella salina algae, natural minerals from the Dead Sea and extra natural vitamins. The revolutionary blend of these ingredients improves the supply of oxygen to skin cells while promoting the absorption of moisture and providing aging skin with the suppleness it demands. This product helps to prevent UV damage as well as treat skin already suffering from the effects of the sun's radiation while assisting in the reduction of excess oil to provide your skin with maximal suppleness, a velvety feel and a smooth appearance.

The Rejuvenating Benefits of REGU®-AGE

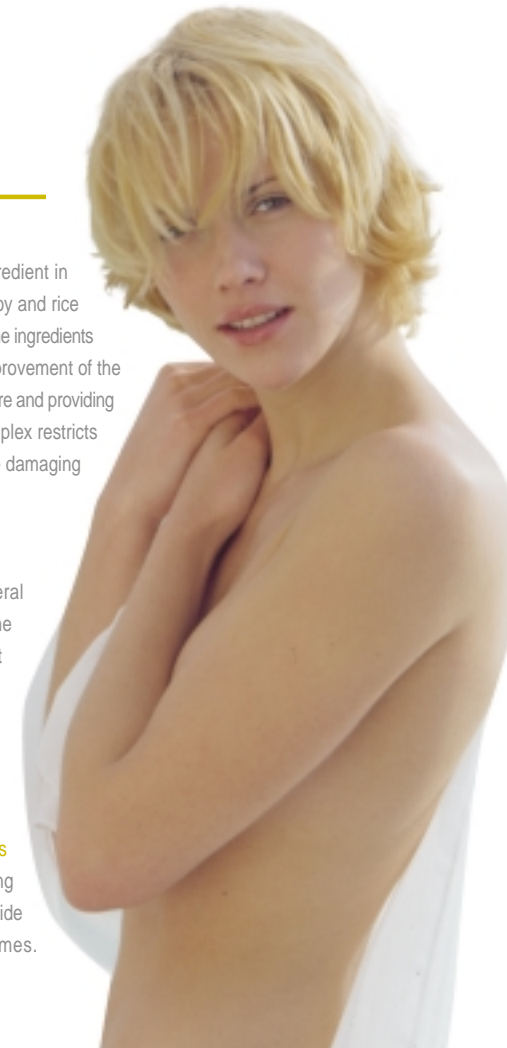

The innovative REGU®-AGE complex, the primary anti-aging ingredient in Beauty Mineral Rejuvenation Complex products, is comprised of soy and rice proteins combined with a biotechnologically-produced yeast protein. The ingredients in this revolutionary complex act together to provide a localized improvement of the supply of oxygen to skin cells while promoting the absorption of moisture and providing aging skin with the suppleness it demands. The REGU®-AGE complex restricts the enzymes elastase and collagenases thus helping to reduce the damaging effects of extensive exposure to UV rays.

The Natural Advantages of Dunaliella salina

Dunaliella salina, a natural anti-aging ingredient in Beauty Mineral Rejuvenation Complex products, is an algae species exclusive to the Dead Sea. This unique component contains an extraordinary amount of beta-carotene, an anti-oxidant that becomes converted to retinol (vitamin A) in the body and aids in the rejuvenation and improvement of skin cells, the prevention of wrinkles and the maintenance of skin suppleness.

The Therapeutic Treasures of the Dead Sea Minerals

The salt lake's exceptionally high concentration of minerals, including magnesium, calcium, sodium, potassium chlorides, iodine and bromide has provided a naturally therapeutic effect since ancient times.

Beauty Mineral Rejuvenation Complex Eye & Neck Cream

REJUVENATION COMPLEX formula is an innovative cosmetic development with its core components comprised of the REGU®-AGE complex, Dunaliella salina algae, natural minerals from the Dead Sea and extra natural vitamins. The REGU®-AGE complex has been proven to be a fast and effective tool that dramatically reduces dark circles and puffiness around the eyes, strengthens the connective tissue, reduces inflammation and the harmful effects of UV radiation. The Rejuvenation Complex, considered effective and active in the improvement and renewal of skin cells, restricts oxidation and therefore assists in preventing the formation of wrinkles in the neck area.
